

MD. ANIK IMTIAZ

Full Stack Developer

Email: anikimtiaz1993@gmail.com | Phone: +880 1734 699652

Location: Dhaka, Bangladesh (Open to Remote / Hybrid)

LinkedIn: linkedin.com/in/anik-imtiaz-b65816209 | GitHub: github.com/anik554

PROFESSIONAL SUMMARY

Full Stack Developer with 3+ years of experience building scalable, enterprise-grade web applications, primarily in healthcare and government systems. Strong expertise in React, TypeScript, Next.js, and Node.js, with hands-on experience designing microservices architectures and integrating secure RESTful APIs. Proven ability to deliver high-performance, user-centric solutions, improve operational efficiency, and collaborate effectively with cross-functional teams in production environments.

TECHNICAL SKILLS

Frontend Technologies

React.js, Next.js, TypeScript, JavaScript (ES6+), Redux Toolkit, RTK Query, Material UI, Tailwind CSS

Backend Technologies

Node.js, Express.js, RESTful APIs, GraphQL

Databases & Caching

PostgreSQL, MongoDB, Redis

Authentication & Security

JWT, OAuth 2.0, Firebase Authentication

Architecture & Practices

Microservices Architecture, Modular System Design, API Integration, Agile/Scrum

Tools & DevOps

Git, Docker, Postman

PROFESSIONAL EXPERIENCE

Programmer (Full Stack Developer)

Crystal Technology Bangladesh Ltd — Dhaka, Bangladesh

July 2022 – Present

- Designed and developed a microservices-based hospital automation system for government national-level hospitals, ensuring scalability, maintainability, and secure data handling.
- Built and maintained critical healthcare modules including OPD, IPD, Pharmacy, Billing, Inventory, Accounting, and Organization Management.
- Developed responsive and accessible user interfaces using React, TypeScript, Material UI, and Tailwind CSS, improving usability for doctors, pharmacists, and administrative users.
- Integrated frontend applications with Node.js APIs and Java Spring Boot microservices, using RESTful services and JWT-based authentication.
- Implemented a biometric digital attendance system with fingerprint device integration and real-time HR reporting, improving attendance accuracy by 40%.
- Developed a single-page prescription system that reduced doctor input time by 60%, enhancing patient care efficiency and daily workflow.
- Built an online patient registration system enabling remote registration with real-time doctor schedule visibility.

- Collaborated with cross-functional teams including product owners, backend engineers, and QA to gather requirements, deliver features, and resolve production issues.

KEY PROJECTS

Hospital Automation Platform (Microservices Architecture)

React, TypeScript, Node.js, PostgreSQL, MongoDB

Designed and developed core healthcare modules:

- Pharmacy: stock management, sales, indents, returns
- Billing: invoicing, refunds, payment workflows
- Inventory: real-time tracking and reorder alerts
- Accounting: ledgers, transactions, financial reports
- Organization Management: departments, roles, staff management

Smart Attendance Management System (DGFP)

Node.js, PostgreSQL, Biometric Integration

- Implemented biometric fingerprint-based attendance tracking with automated HR reports.
- Improved workforce accountability and compliance reporting through real-time dashboards.

Single Page Prescription Interface

React, TypeScript

- Built a fast and intuitive prescription UI with auto-complete medication search and dosage templates.
- Significantly reduced prescription processing time for doctors.

Online Patient Registration System

React, Node.js, PostgreSQL

- Developed a remote patient registration portal with appointment booking and doctor schedule visibility.
- Integrated seamlessly with the national hospital automation system.

Healthcare Doctor Appointment System

React, Node.js, PostgreSQL, Stripe, Video Integration

- Built a mobile-first full stack application with role-based access for admin, doctors, and patients.
- Implemented AI-based doctor recommendations, online appointment booking, secure Stripe payment integration, and real-time video consultations.

EDUCATION

Master of Science in Computer Science and Engineering

Jagannath University, Dhaka, Bangladesh

Ongoing

Bachelor of Science in Computer Science and Engineering

State University of Bangladesh

March 2013 – January 2018
